Letter of recommendation on behalf of Dong Woon Kim

To whom it may concern.

Mr. Dong Woon Kim is a diligent medical student whom I had the pleasure of studying alongside during our first three years at Jagiellonian University Medical College. He was like myself the class representative for the medical class of MD 2022 and a member of the Six Year Student Government. He held this position since October 2016 to June 2017.

Mr. Kim is a polite, respectful, and responsible student. During his work as class representative and student government member he demonstrated multiple core values like leadership, integrity, and determination. Mr. Kim proved to be an asset to our student government with his positive attitude and dependability.

Mr. Kim willingly accepted new assignments and offered to help wherever he could. He is punctual and typically performs within expectation at his tasks.

Due to the good nature and professionalism exhibited by Mr. Kim during our three years as colleagues I would have no hesitation on giving him my full recommendation to be accepted as a student at Columbia Engineering.

If you have any questions regarding Mr. Dong Woon Kim, please do not hesitate to contact me.

Sincerely,

Ingebrigt Grimstad Holstad M.D.

Lege i Spesialisering (LIS1), Sykehuset i Hamar.
